PROFESSIONAL EXPERIENCE

NXTWAVE DISRUPTIVE TECHNOLOGIES PVT LTD

05/2025 – Present | Hyderabad, India

Generative AI Engineer and Creative Lead

- Currently helping the team of **20+ creatives** and leading 3 engineers.
- **Engineered a AI based Video Editing Software** which automates the entire content creation process.
- **Engineered 14 scalable full-stack applications** utilizing Python and JavaScript, integrating advanced RAG pipelines and LLM frameworks to solve complex workflow challenges.
- **Designed and developed internal enterprise web tools**, creating custom frontend interfaces that enabled users to easily interact with complex backend automation systems.
- **Built robust backend RESTful APIs** and analytics tracking systems (Content Nexus) to monitor application performance, usage data, and system reliability.
- **Pioneered Python and JSON-based automation scripting** for programmatic API control, successfully integrating external technologies into streamlined user workflows.
- **Architected standardized frameworks** to automate complex production cycles, significantly reducing manual configuration and slashing task completion time by 90%.
- **Developed and maintained automated processing pipelines**, scaling system capabilities to successfully handle thousands of programmatic requests and batch processes reliably.
- **Developed advanced automation agents and intelligent chatbots**, demonstrating a strong ability to translate complex logic into intuitive, user-facing tools.
- **Bridged the gap between advanced AI capabilities and practical usability**, consistently delivering high-quality, containerized solutions that improved overall system productivity.
- **Digital Growth:** Managed and scaled 14 digital channels from 0 to 100K+ followers, successfully facilitating the production of 1,000+ videos per month and 100+ character-consistent AI advertisements.
- **Team Leadership:** Conducted extensive technical knowledge transfer sessions on AI workflows, Figma design layouts, Markdown/LaTeX documentation, and video rendering for editors and L&D teams

CrestLogic Systems PVT LTD

11/2024 – 03/2025 | Telangana, India

Founding Engineer

- Took the company from 0 to 1.
- Developed POS Hardware, Software (PWA and ElectronJS).
- Engineering Custom Headless Operating System on top of Baremetal Ubuntu 22.04.
- Strategised products, design and campaigns and generated revenue of 2M INR.

Andhra Pradesh Solar Power Corporation Pvt Ltd

07/2024 – 10/2024 | Vijayawada, India

Product Design Engineer (Consultant)

- Designed and Developed 2 fullstack Web applications with the web applications.
- Made components according to their design system and guidelines
- Improved the dashboards and admin panels with mobile responsiveness.

Traboda Solutions PVT LTD

08/2023 – 07/2024 | Kollam, India

Product Engineer (Intern)

- Engineered the GUI's for CyberSecurity and Embedded products.
- Conducted UX Research, Enhanced and optimized the organization's UI systems to improve user experience
- Contributed in development of Chaya UI (**chaya.traboda.com** ) , Traboda Gamified Learning Platform (**app.traboda.com** ) , Arena (**arena.traboda.com** ) and Traboda Pay (**pay.traboda.com** )
- Focused on creating seamless and efficient user journeys for internal projects and client-facing-platforms.

Redantio Solutions PVT LTD

01/2022 – 02/2023 | Kollam, India

Design and Development Engineer (Intern)

- Collaborated with the CEO and Product team to prototype and design user interfaces and experiences (UI/UX).
- Key designer for **Compatriot** 
- Designed and developed hardware GUIs and designed PCBs, ensuring seamless integration of software and hardware
- Conducted research, testing, and iterative improvements to enhance product usability
- Collaborated with software and hardware teams to streamline development.
- Engineered the Lora Detection algorithm and User Interface to detect lora signals in 800ms.

SKILLS

UI/UX

Figma, Jira, User flows, Experience Mapping, Wireframes, Mockups, Prototyping, Design System

Research & Test

Usability testings, Personas, Competitor analysis, Card Sorting, Tree testing, User journeys

Full Stack Development

Go Lang, ElectronJS, Vite, React, NextJS, Typescript, Python, Django Javascript, GraphQL, REST, NodeJS.

Infrastructure & Version Control

Docker, Kubernetes, CI/CD Pipelines, Git/GitHub, Network Fundamentals, Supabase

AI Research

API- OpenAI, LangChain, Hugging Face | Development - ChatGPT, Claude, PerplexityLLM - GPT 3 , GPT 4 | Image Generation - Flux Models, SDXL, SD 1.5 and Custom Lora Trainings | Video Generation - ChatGPT, Hunyuan Models

Cinematic Post-Production

Video editing suites, advanced color grading, sound design/syncing, digital audio workstations (FL Studio), Remotion library.

OPEN SOURCE

CHAYA UI [↗](#)

React component library

Modern, functional design system and component library for React made with Nextjs and TailwindCSS.

ToothPaste [↗](#)

Open Source adobe plugin which allows users to directly paste the media files into the timeline and project with out need of downloading.

OpenWeave [↗](#)

Web and Windows Application

Open Source Figma Alternative with AI Capabilities which runs locally and globally (using ngrok).

EDUCATION

B.Tech (Electronics and Communication Engineering)

2021 – 2025 | Vijayawada, Andhra Pradesh

KL University

GSOC 23
