SUMMARY

UI engineer who **transitioned from freelance UI designer to engineer**, now building frontend-focused full-stack products with React, Next.js, and TypeScript, with AI built into how I design, code, and ship. I lead the front end of an AI video editor at NxtWave, have shipped 14 LLM-powered web applications, and contributed to an open-source React design system. **Founded Billjot** and worked directly with the founders of Traboda and Redantio; at NxtWave I work closely with **VPs and heads of department**.

EXPERIENCE

Generative AI Engineer and Creative Lead, NxtWave Disruptive Technologies — May 2025 - Present

- **Lead 3 engineers and a 20+ person creative team** on an AI video editor; own the **React and TypeScript** interface from prompt and timeline to review.
- **Shipped 14 web applications** using large language models (LLMs), RAG, and context-aware agents.
- **Automated design system creation with AI bots**, now used across **5 applications on web, Android, and iOS**; cut the time to create new design systems and reduced reliance on shadcn/ui.
- Built private **Figma plugins that convert designs into live webpages** and let Figma files **act as a CMS**, so content and layout updates publish straight from design.
- Built **ContentFlow**, a role-based content platform with **30+ dashboards** and an 8-stage production pipeline across 5 languages, and **Content Nexus**, a REST service for usage, performance, and reliability.
- **Cut production setup time by 90%** with shared Python and JSON automation handling thousands of batch requests (Veo 3, Wan 2.2), helping grow **14 channels from 0 to 100K+ followers** and 1,000+ videos per month.

Founder, Billjot — Nov 2024 - Mar 2025

- **Took Billjot from 0 to 1**: an HTML5 PWA and **Electron** client on custom POS hardware with a headless OS.
- Owned the billing UI, branding, and marketing funnel; the product **generated INR 2M in revenue**.

Product and Design Engineer (Consultant), Andhra Pradesh Solar Power Corporation — Jul 2024 - Oct 2024

- Designed and built the public **APSPCL website** (apspcl.ap.gov.in) and admin dashboards for the state solar power corporation.
- Created a **design system** and built **internal tools and a CRM** to manage the corporation's operations.

Product Engineer Intern, Traboda CyberLabs — Aug 2023 - Jul 2024

- **Core contributor to Chaya UI**, an open-source React and Tailwind design system; authored components used in 3 Traboda products.
- Built React interfaces for cybersecurity and embedded products, including the web UI and hardware GUI for a WiFi Pineapple device.

Design and Development Engineer Intern, Redantio — Jan 2022 - Feb 2023

- **Key designer for CompatrIoT**, an open hardware-security trainer (STM32, ESP32) with 20 gamified labs; built a LoRa detection interface that **identifies signals in 800 ms**. Tutored Figma.
- Created **terminal UIs for hardware badges** using Python (Tkinter) and CMake.

PROJECTS

OpenWeave | Next.js, TypeScript, Tauri, WebRTC, MCP | worldofsatya.in/works/openweave

- Open, programmable design editor that reads and writes Figma files; AI builds designs with 90+ tools, plus a CLI, MCP server, JSX/Tailwind export, and peer-to-peer collaboration in a 7 MB desktop app.

NotBad | Flutter, Dart | worldofsatya.in/works/notbad

- Cross-platform Markdown editor with concealed syntax; 3.5k lines of Dart replace 42k upstream, 1-second cold start.

Toothpaste | Adobe CEP, JavaScript, FFmpeg | worldofsatya.in/works/toothpaste

- Premiere Pro and After Effects extension that imports pasted images, file paths, or URLs straight onto the timeline.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, shadcn/ui, Electron, Tauri, Flutter

AI: Large Language Models (LLMs), RAG, AI agents, Model Context Protocol (MCP), Generative AI, Python automation

Design: Figma, UI/UX Design, Design Systems, Graphic Design, Adobe Photoshop, Adobe Illustrator, Adobe After Effects, Motion Design

Tools: REST APIs, Supabase, PostgreSQL, Git, CI/CD

EDUCATION

Bachelor of Engineering, Electronics and Communication Engineering, Koneru Lakshmaiah University (GPA 8.6/10) — 2025

ACHIEVEMENTS

- Google Summer of Code 2024 (qualified); NASA Space Apps Galactic Impact Award 2023; Smart India Hackathon 2022 Finalist.
- Kavach 2023 Runner-up; Nullcon Goa 2022 Top 5; 14 hackathon wins; founded Engineerudu, Andhra Pradesh's first FOSS community.
