SUMMARY

Designing interfaces since 16, I grew from freelance UI designer into a full-stack engineer with a frontend focus, taking products from Figma to production across React, Next.js, TypeScript, and the APIs and data behind them, with AI built into how I design, code, and ship. Today I lead design and engineering for an AI video editor at NxtWave, working directly with **VPs and heads of department**.

EXPERIENCE

NxtWave Disruptive Technologies, Hyderabad — May 2025 - Present

Generative AI Engineer (promoted) — May 2026 - Present

- **Lead design and engineering for an AI video editor** that automates content creation end to end, with 3 engineers and a 20+ person creative team; own it from the product design and **React and TypeScript** interface to the APIs and generation pipelines behind it.
- **Shipped 10+ full-stack applications** in Python and JavaScript on **LLMs, RAG pipelines, and AI agents**.
- **Cut task completion time by 90%** with Python and JSON automation handling thousands of batch requests (Veo 3, Wan 2.2).
- Built **Content Nexus**, REST APIs and analytics for team performance, usage, and reliability.

Gen AI Creator — May 2025 - May 2026

- **Built 5 internal full-stack apps**, including **ContentFlow**, a Next.js PWA for media-house project management with **30+ dashboards** and an 8-stage pipeline across 5 languages.
- **Automated content creation** with an auto video editor and AI avatars, growing **14 channels from 0 to 100K+ followers**.
- **Turned Figma into a CMS**: private plugins publish designs as live webpages; Figma + AI automates thumbnails.
- **5 apps on web, Android, and iOS** run on design systems generated by AI bots I built, cutting setup time and reliance on shadcn/ui.

Founder, Billjot — Nov 2024 - Mar 2025

- **INR 2M in revenue**: took Billjot from 0 to 1, from a **MERN** PWA for local billing to **Supabase** and an **Electron** POS client.
- **Built a custom ERP for food and beverage businesses**: offline-first POS billing, KOT routing to kitchen screens, QR table ordering, live inventory alerts, and a multi-outlet console; now on **500+ terminals in 584 restaurants**.

Product and Design Engineer (Consultant), Andhra Pradesh Solar Power Corporation — Jul 2024 - Oct 2024

- **Shipped the public APSPCL website** (apspcl.ap.gov.in) and admin dashboards for the state solar power corporation.
- Built a **design system**, **internal tools, and a CRM** to run the corporation's operations.

Product Engineer Intern, Traboda CyberLabs — Aug 2023 - Jul 2024

- **Core contributor to Chaya UI**, an open-source React and Tailwind design system; authored components used in 3 Traboda products.
- Built **React and Node.js** apps for cybersecurity and embedded products, including the WiFi Pineapple web UI and GUI.

Design and Development Engineer Intern, Redantio — Jan 2022 - Feb 2023

- **Identifies signals in 800 ms**: built the LoRa detection interface and was key designer for **CompatrIoT**, an open hardware-security trainer (STM32, ESP32) with 20 gamified labs. Tutored Figma.
- Built **Node.js** web tooling for the labs, and **terminal UIs for hardware badges** using Python (Tkinter) and CMake.

PROJECTS

OpenWeave | Next.js, TypeScript, Electron, WebRTC, MCP | worldofsatya.in/works/openweave

- Open, programmable design editor that reads and writes Figma files; AI builds designs with **90+ tools**, plus a CLI, MCP server, JSX/Tailwind export, and peer-to-peer collaboration, as a **desktop app and browser PWA**.

NotBad | Flutter, Dart | worldofsatya.in/works/notbad

- Cross-platform Markdown editor with concealed syntax; **3.5k lines of Dart replace 42k upstream**, with a 1-second cold start.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, shadcn/ui, Electron, Tauri, Flutter

AI: Large Language Models (LLMs), RAG, AI agents, Model Context Protocol (MCP), Generative AI, Python automation

Design: Figma, UI/UX Design, Design Systems, Graphic Design, Adobe Photoshop, Adobe Illustrator, Adobe After Effects, Motion Design

Testing and Quality: Jest, React Testing Library, Playwright, Accessibility (WCAG 2.1, ARIA), Lighthouse, Core Web Vitals

Backend and Tools: Node.js, Express, MongoDB (MERN), Supabase, REST APIs, Git, CI/CD

EDUCATION

Bachelor of Engineering, Electronics and Communication Engineering, Koneru Lakshmaiah University (GPA 8.6/10) — 2025

ACHIEVEMENTS

- Google Summer of Code 2024 (qualified); NASA Space Apps Galactic Impact Award 2023; Smart India Hackathon 2022 Finalist.
- Kavach 2023 Runner-up; Nullcon Goa 2022 Top 5; 14 hackathon wins; founded Engineerudu, Andhra Pradesh's first FOSS community.
